

MARKAUDIO SOTA

HEAR OUR DIFFERENCE

CESTI MB

MarkAudio-SOTA's small bookshelf speakers combine Italian style with British engineering design that follow the company's "Hear Our Difference" audio philosophy. The speakers utilize a single all-range symmetric driver to create a full range loudspeaker in an elegant and finely finished cabinet. Our proprietary minimalist control network [MA1] intelligently controls the driver, delivering pure music to the listener while minimizing artificial processing. Laminated dual-core panels and space-age polymers provide enclosures of maximum strength and acoustic stability. The result is statement-level sound quality for the discerning listener.

C E S T I M B K E Y F E A T U R E S

BUILT FROM THE GROUND UP

MarkAudio-SOTA loudspeakers are built from the ground up, including the cabinets, internal components and speaker driver. Many manufacturers choose off-the-shelf components that aren't always a perfect match to their system design target.

ALL-RANGE DRIVER APPROACH (EQUALS RICH, TRANSPARENT MIDRANGE WITH FULL FREQUENCY RANGE AND IMPACTFUL DYNAMICS)

MarkAudio-SOTA's unique all-range approach offers the rich midrange that is typical of a wide-range single speaker design, while providing a full frequency range extending from 40Hz to 25kHz, and the high-impact dynamics of more typical multi-way speakers.

SYMMETRICAL SOUND FIELD

MarkAudio-SOTA uses its own symmetrical technology. The single, wide dispersion, shallow-profile cone driver replaces conventional dual cone-woofer and dome-tweeter combinations.

MONEY BACK GUARANTEE

We are so confident that you'll have no problem getting great sound from your MarkAudio-SOTA loudspeakers that we offer you 30 days to order the speakers, get them home, set them up and listen to them before final decision.

GLOBAL DESIGN: THE BEST ENGINEERS AND DESIGNERS FROM AROUND THE WORLD

The global dream team at MarkAudio-SOTA recruited a global dream panel of experts to help tune the sound character, thus creating outstanding loudspeakers for discerning listeners.

MATSUBARA SAN

STEVE CHENG

Founder Steve Cheng formed SOTA Acoustics Limited in 2014. Having maintained a keen audio interest over many years, the time came to turn dreams into a reality. Steve is the Executive Director and Chairman of Telefield, a substantial manufacturing company group based in Hong Kong, experience that will assist SOTA in its growth and development. Steve has 30 plus years of postgraduate level experience in consumer electronic products industry from telephones, personal security devices, alarms and A/V amplification and large scale manufacturing, giving him a near unique set of skills and a wide industrial perspective to lead SOTA. A devotee of electronics and new technology, Steve has recently become the proud owner of a Tesla all-electric car.

DR. SCOTT LINDGREN

Dr. Scott Lindgren is well-known as a loudspeaker designer and has produced a large number of highly-regarded systems for the commercial and custom-build markets, working both individually and as part of international development teams. Dr. Scott specializes in enclosure and filter design. Scott's contribution to MarkAudio-SOTA includes large-scale projects working in collaboration with Mark Fenlon and Matsubara San to create our different series of loudspeakers. Outside his work in acoustics he is also a highly respected naval historian.

MARK FENLON

Consultant Mark Fenlon leads on product development and technical application. Mark also contributes to SOTA's marketing development. Mark's engineering background initially comes from the energy sector specializing in material flow dynamics, production and control. He was the originator of the Alpair and CHR series of Full-Range audio drivers under the original MarkAudio brand. With 30 plus years of post graduate mechanical-industrial and product design experience, his passion for home audio started at 18 years of age when he built his own set of loudspeakers. Mark is an enthusiast for Japanese vintage audio equipment that includes rare Victor and Sansui. He also owns and restores classic Subaru Impreza and Mitsubishi Evolution 4 wheel driver sport cars. Mark works in collaboration with Matsubara San and Dr Scott Lindgren.

MATSUBARA SAN

An engineering science graduate, Matsubara has over 35 years of transducer and loudspeaker leading design experience based in Japan and China with major international Hi-Fi brands. His research includes the operational efficiency of audio drivers. Matsubara's contribution to MarkAudio-SOTA includes large scale loudspeaker projects working in collaboration with Mark Fenlon and Dr. Scott Lindgren.

DESIGN	Small size full-spectrum bookshelf loudspeakers
FINISHES	Black / Red / White
DRIVER UNITS	1 x 110mm (4.4 inch) low mass, long throw mix alloy symmetrical sound field cone unit (Sota 11)
FREQUENCY RANGE ±3DB	40Hz – 25KHz anechoic
SENSITIVITY (1W @ 1M)	88.5dB
IMPEDANCE (NOMINAL)	6 ohms
DIMENSIONS (EACH) (MM)	226mm x 194mm x 336mm
DIMENSIONS (EACH) (INCHES)	8 29/32 x 7 21/32 x 13 7/32
WEIGHT (EACH) (KG)	6.14
WEIGHT (EACH) (LBS)	13 lbs 8 oz
AMPLIFIER REQUIREMENTS	
CLASS A / B @ 8 OHM PER CHANNEL	50W to 100W
CLASS A @ 8 OHM PER CHANNEL	12W to 25W
CLASS D @ 8 OHM PER CHANNEL	30W to 60W
SPEAKER PACKAGING DIMENSIONS (MM)	625mm x 310mm x 435mm
SPEAKER PACKAGING DIMENSIONS (INCHES)	24 19/32 x 12 7/32 x 17 3/32
NET WEIGHT (KG)	12.3
NET WEIGHT (LBS / OZ)	27 lbs 2 oz
GROSS WEIGHT (KG)	14.5
GROSS WEIGHT (LBS)	31 lbs 15 oz
CBM	0.08
QTY PER BOX	2 pc
